

450AJ SII Articulating Boom Lift

APPLICATIONS

- Facilities maintenance
- Electricians
- Plumbers
- Maintenance and construction work
- Factory fit outs before electrical power is connected

Proportional controller for lift and lower and boom swing give smooth control

One handed operation for operator comfort and control. Proportional drive controller gives smooth control

Jib boom and basket rotate allows additional functionality and access to hard to reach positions

Articulated boom function provides increased outreach at height and allows fast operation from ground to full height using upper boom lift and main boom, telescope and jib

Load Sensing System

Low maintenance steel platform with non-skid mesh floor, and side entry gate. Enclosed foot switch

Cylinder boots protect cylinder shafts from debris and contaminants

Exhaust purifier allows work in ventilated indoor areas

Deutz D2011L03 Tier 4; (interim) diesel engine and transmission pump to match drive and function, power and performance requirements with a quieter engine and lower operating cost

Tie down and lifting lugs for ease of transport

Front axle oscillates when travelling with counterweight over steer tyres, assists in accessing difficult sites

Non-marking, urethane filled, puncture proof lug

4 wheel drive with hydraulic piston 2 speed motors, gear reduction hubs and spring applied brakes for 4 wheel drive traction, provides maximum traction and ease of steering

QUESTIONS TO ASK

- What are the ground conditions in the work area?
- What are the site conditions travelling around the site?
- What is the working height needed for the job?
- What is the up and over outreach required for the job?
- Do you need an extension lead outlet in the platform?
- Will an inbuilt Miller 5.5kVA generator make the job easier?

KEY SELLING POINTS

- Smoother control, proportional hydraulic 4 wheel drive, with two speed ranges
- Proportional lift and swing controls at the platform
- Oscillating front steer axle with the boom within 10 degrees of centre, assists 4 wheel drive traction
- Tight steering turning circle
- No tail swing
- Jib boom and basket rotate
- Cylinder boots protect cylinder rods from overspray and contaminants
- Lug pattern urethane filled non-marking tyres
- Multi axis 4 degree level sensor
- Plug in JLG analyser at platform and base to indicate system functions for servicing and adjustment
- Deutz D2011L03 (36.4kW), reduces noise, vibration, emissions and runs at a slower speed to reduce fuel use
